

Bee Cave Drilling, Inc. Temporary Water Service

We are proud to offer temporary water service right to your site. We will deliver a 3,000 gallon potable water storage bag. We will install a booster pumping system, water hose, and extension cord to provide pressurized water. The pump will move about 7 gpm at 50 psi. If you have a house onsite, we can hook up our hose to your faucet and pressurize your water lines. We will also deliver potable water to fill the bag and keep your water running. It is your responsibility to protect the equipment from damage. All we require is a flat surface 15' X 15' that is within 50' of a power outlet and 100' of water faucet. Our prices are outlined below.

Deposit \$1000.00 (Waived for repeat clients)

Labor to install and remove equipment (includes first 2,000 gallon load of water) \$500.00

Weekly rental charge \$200.00

When we get our equipment back, we will charge for any damages. Total cost of equipment is \$3,500.00

We will collect the deposit, install charge, and first week's rent upon installation.
